ElectraNet overnight power outage – Eyre Peninsula

An estimated 10,000 customers in the West Coast and Eastern Eyre Peninsula districts, are expected to be without power overnight and into Friday evening due to a loss of transmission supply from ElectraNet.

ElectraNet's transmission network supplies bulk high-voltage power to SA Power Networks' distribution network, which we further distribute to customers.

This is a major restoration operation and SA Power Networks is offering full support to ElectraNet in this response effort.

Customers can keep a track of expected restoration times via our website:

www.sapowernetworks.com.au
