

Saturday 10 September
Eyre Peninsula - power restored

Transmission supply was received from ElectraNet at 9pm last night, following a delay in restoration work, due to site access issues. The transmission system outage resulted in about 10,000 customers without power on Eyre Peninsula from Thursday 8 September.

SA Power Networks were able to restore power to the affected areas by 12.30am this morning.

Well done to all crews involved.

ElectraNet's transmission networks supplies bulk-high voltage power to SA Power Networks distribution network, which we further distribute to customers.
